

K-Love continues to provide an encouraging alternative to the negative music played by most stations in Wilmington, OH and across the US. K-Love is helping people to lead more positive lives, raise more kind and caring children. As children are exposed to the other stations in this area they are learning and applying the unacceptable behavior that is demonstrated, but K-Love provides parents with the opportunity to show their children the love of God and how to show compassion for those around them. I believe K-Love is in the public interest because our town and others need an alternative to music promoting rape, violence, premarital sex and teen pregnancies. Those stations are not decreasing the amount of violence in this country and maybe K-Love isn't changing thousands of lives a day, but if it helps even one person and if thousands of people each day are even slightly encouraged to be better people then K-Love should remain on the air in my area and across the country. Thank you.
